## PREFATORY NOTE

The following schedules were made in 1904 by Mr. S. C. Stuntz, under the direction of Mr. Martel, Chief Classifier. The arrangement of material relating to navies follows in general the classification of Military Science which is based upon the "Classification and Index" of the Military Information Division of the Adjutant-General's Office, U. S. War Department. In the arrangement of sailing directions and similar lists in VK, the publications of the British Hydrographic Office were followed in their general order as furnishing the most complete series available for a systematic list.

Since 1905 the classification of this subject has been in charge of the undersigned and numerous changes have been made. As the material has not yet been recataloged the schedules are still to be considered as provisional.

CLARENCE W. PERLEY  
*Acting Chief Classifier*

HERBERT PUTNAM  
*Librarian of Congress*

# INDEX.

Names of countries are not included in this index except in the case of pilot guides, tide tables, and a few headings under United States and Great Britain. Pilot guides and tide tables are made an exception on account of the fact that their primary arrangement in the schedules is by oceans, seas, etc., and only secondarily by country. In other cases the country subdivisions of any given subject may be readily found by referring to the scheme itself.
